

Adaptive Game Model - Coach Report

Tactical adjustment recommendations with uncertainty

How to read this

Each recommendation states the opponent structure, the adjustment, the expected change in possession value per possession, a confidence interval, the sample it is based on, the main risk and the execution requirement.

Low-confidence rows are deliberately flagged - treat them as hypotheses, not instructions.

Recommended adjustments (ranked)

State	Adjustment	Uplift / possession	95% CI
Final-third attack vs compact defence	s_third_man_combination	+0.013	[+0.008, +0.019]
Final-third attack vs compact defence	s_reduce_risky_central_passes	+0.010	[-0.002, +0.020]
Final-third attack vs compact defence	s_increase_winger_width	+0.004	[-0.012, +0.013]
Final-third attack vs compact defence	s_aggressive_counterpress	+0.001	[-0.010, +0.014]
Opponent high press	s_third_man_combination	+0.011	[+0.009, +0.013]
Opponent high press	s_increase_winger_width	+0.006	[+0.000, +0.012]
Opponent high press	s_reduce_risky_central_passes	-0.002	[-0.004, +0.001]
Opponent high press	s_mid_block_retreat	-0.006	[-0.007, -0.005]
Opponent high press	s_aggressive_counterpress	-0.010	[-0.013, -0.007]

Final-third attack vs compact defence - s_third_man_combination

Expected benefit: +0.013 EPV/possession (95% CI [+0.008, +0.019]). Confidence: high. Sample: 116 sequences (68 treated / 48 control).

Main risk: Medium execution risk; combinations fail under intense pressure without strong first touches.

Execution: Pattern - rehearsed combinations between three players.

Final-third attack vs compact defence - s_reduce_risky_central_passes

Expected benefit: +0.010 EPV/possession (95% CI [-0.002, +0.020]). Confidence: medium. Sample: 116 sequences (89 treated / 27 control).

Main risk: Can slow progression and invite the block to settle; risk of over-safety.

Execution: Decision rule - pass map restrictions in central zones.

Final-third attack vs compact defence - s_increase_winger_width

Expected benefit: +0.004 EPV/possession (95% CI [-0.012, +0.013]). Confidence: medium. Sample: 116 sequences (31 treated / 85 control).

Main risk: Wingers can become isolated from central support if the opponent tracks with the full-back.

Execution: Individual - width references for wingers.

Final-third attack vs compact defence - s_aggressive_counterpress

Expected benefit: +0.001 EPV/possession (95% CI [-0.010, +0.014]). Confidence: medium. Sample: 116 sequences (29 treated / 87 control).

Main risk: High exposure if the first press is bypassed; leaves space in behind.

Execution: Trigger - immediate pressure on the first pass after loss.

Opponent high press - s_third_man_combination

Expected benefit: +0.011 EPV/possession (95% CI [+0.009, +0.013]). Confidence: high. Sample: 1007 sequences (378 treated / 629 control).

Main risk: Medium execution risk; combinations fail under intense pressure without strong first touches.

Execution: Pattern - rehearsed combinations between three players.

Opponent high press - s_increase_winger_width

Expected benefit: +0.006 EPV/possession (95% CI [+0.000, +0.012]). Confidence: high. Sample: 1007 sequences (167 treated / 840 control).

Main risk: Wingers can become isolated from central support if the opponent tracks with the full-back.

Execution: Individual - width references for wingers.

Tactical state glossary

Opponent low block - Opponent retreats into a deep block, denies central access, invites wide circulation before the final line.

Opponent high press - Opponent presses high and aggressively; central access is denied and turnovers occur high up the pitch.

Build-up vs narrow front two - Opponent's front two stay narrow, cutting central build-up lanes; full-backs gain space.

Defensive transition after loss - Ball just lost; opponent is transitioning, our structure is unsettled and numbers around the ball are in flux.

Wide overload - Our possession is concentrated on one flank; opponent shifts, creating space on the far side.

Central progression - Possession is advancing through central channels between opponent lines.

Final-third attack vs compact defence - Ball is in the final third against a compact defensive block; half-spaces are the key zones.

Neutral build-up / rest state - Routine build-up with neither team committing aggressively.

Relevant sequences to review

Match 1 | CF Real Blanco | min 2 | state: Opponent high press | outcome level 4 (shot xG 0.05)

Match 2 | FC Azul Marino | min 0 | state: Opponent high press | outcome level 4 (shot xG 0.05)

Match 3 | Sevilla Roja | min 10 | state: Opponent high press | outcome level 4 (shot xG 0.05)

Match 4 | Valencia Naranja | min 0 | state: Opponent high press | outcome level 4 (shot xG 0.05)

Match 5 | CF Real Blanco | min 3 | state: Opponent high press | outcome level 4 (shot xG 0.05)
