

Adaptive Game Model - Coach Report

Tactical adjustment recommendations with uncertainty

How to read this

Each recommendation states the opponent structure, the adjustment, the expected change in possession value per possession, a confidence interval, the sample it is based on, the main risk and the execution requirement.

Low-confidence rows are deliberately flagged - treat them as hypotheses, not instructions.

Recommended adjustments (ranked)

State	Adjustment	Uplift / possession	95% CI
Final-third attack vs compact defence	s_third_man_combination	+0.012	[+0.005, +0.018]
Final-third attack vs compact defence	s_aggressive_counterpress	-0.005	[-0.010, +0.001]
Neutral build-up / rest state	s_mid_block_retreat	+0.016	[+0.014, +0.020]
Opponent high press	s_aggressive_counterpress	-0.000	[-0.003, +0.002]
Opponent high press	s_mid_block_retreat	-0.001	[-0.004, +0.001]
Opponent high press	s_third_man_combination	-0.005	[-0.008, -0.002]
Opponent low block	s_aggressive_counterpress	+0.002	[-0.005, +0.009]
Opponent low block	s_third_man_combination	-0.012	[-0.030, +0.013]
Wide overload	s_aggressive_counterpress	+0.008	[-0.016, +0.032]
Wide overload	s_third_man_combination	-0.001	[-0.027, +0.023]

Final-third attack vs compact defence - s_third_man_combination

Expected benefit: +0.012 EPV/possession (95% CI [+0.005, +0.018]). Confidence: high. Sample: 753 sequences (430 treated / 323 control).

Main risk: Medium execution risk; combinations fail under intense pressure without strong first touches.

Execution: Pattern - rehearsed combinations between three players.

Final-third attack vs compact defence - s_aggressive_counterpress

Expected benefit: -0.005 EPV/possession (95% CI [-0.010, +0.001]). Confidence: medium. Sample: 753 sequences (249 treated / 504 control).

Main risk: High exposure if the first press is bypassed; leaves space in behind.

Execution: Trigger - immediate pressure on the first pass after loss.

Neutral build-up / rest state - s_mid_block_retreat

Expected benefit: +0.016 EPV/possession (95% CI [+0.014, +0.020]). Confidence: medium. Sample: 311 sequences (168 treated / 143 control).

Main risk: Concedes territorial control and gives the opponent uncontested build-up.

Execution: Structural - repositioning below the ball at the moment of loss.

Opponent high press - s_aggressive_counterpress

Expected benefit: -0.000 EPV/possession (95% CI [-0.003, +0.002]). Confidence: medium. Sample: 2166 sequences (400 treated / 1766 control).

Main risk: High exposure if the first press is bypassed; leaves space in behind.

Execution: Trigger - immediate pressure on the first pass after loss.

Opponent high press - s_mid_block_retreat

Expected benefit: -0.001 EPV/possession (95% CI [-0.004, +0.001]). Confidence: medium. Sample: 2166 sequences (264 treated / 1902 control).

Main risk: Concedes territorial control and gives the opponent uncontested build-up.

Execution: Structural - repositioning below the ball at the moment of loss.

Opponent high press - s_third_man_combination

Expected benefit: -0.005 EPV/possession (95% CI [-0.008, -0.002]). Confidence: medium. Sample: 2166 sequences (169 treated / 1997 control).

Main risk: Medium execution risk; combinations fail under intense pressure without strong first touches.

Execution: Pattern - rehearsed combinations between three players.

Tactical state glossary

Opponent low block - Opponent retreats into a deep block, denies central access, invites wide circulation before the final line.

Opponent high press - Opponent presses high and aggressively; central access is denied and turnovers occur high up the pitch.

Build-up vs narrow front two - Opponent's front two stay narrow, cutting central build-up lanes; full-backs gain space.

Defensive transition after loss - Ball just lost; opponent is transitioning, our structure is unsettled and numbers around the ball are in flux.

Wide overload - Our possession is concentrated on one flank; opponent shifts, creating space on the far side.

Central progression - Possession is advancing through central channels between opponent lines.

Final-third attack vs compact defence - Ball is in the final third against a compact defensive block; half-spaces are the key zones.

Neutral build-up / rest state - Routine build-up with neither team committing aggressively.

Relevant sequences to review

Match 266166 | Atlético Madrid | min 0 | state: Final-third attack vs compact defence | outcome level 4 (shot xG 0.07)

Match 266236 | Athletic Club | min 14 | state: Final-third attack vs compact defence | outcome level 4 (shot xG 0.03)

Match 266424 | Barcelona | min 5 | state: Wide overload | outcome level 4 (shot xG 0.13)

Match 266467 | Celta Vigo | min 5 | state: Final-third attack vs compact defence | outcome level 4 (shot xG 0.02)

Match 266490 | Barcelona | min 6 | state: Opponent low block | outcome level 4 (shot xG 0.02)
