

Example Opponent Report

Atlético Madrid vs Barcelona - 2015-09-12

Tactical state mix expected

- Opponent high press: 86 sequences (50%)
- Opponent low block: 30 sequences (17%)
- Wide overload: 25 sequences (14%)
- Final-third attack vs compact defence: 25 sequences (14%)
- Neutral build-up / rest state: 6 sequences (4%)
- Build-up vs narrow front two: 0 sequences (0%)
- Defensive transition after loss: 0 sequences (0%)
- Central progression: 0 sequences (0%)

Recommended adjustment

Against **Neutral build-up / rest state**, adopting **s mid block retreat** historically created **+0.016** expected possession value per possession** (95% CI [+0.014, +0.020]) with **medium confidence**, based on 311 comparable sequences.

Risk: Concedes territorial control and gives the opponent uncontested build-up.

Execution: Structural - repositioning below the ball at the moment of loss.

Applicability limits

Event-based estimates only; no tracking data. Validation is chronological and league-specific.
